- Ability to meet the licensing requirements of a Chemical Dependency Professional in Washington State (CDP) consistent with WAC 388-877 and RCW 18.205 at hire preferred;
- Previous documented experience working with an understanding of statistical methods, managing budgets, supervision of personnel and program management;
- Current unencumbered driver license and proof of current car insurance may be required;
- Current CPR/1st Aid certification required for staff members;
- Good verbal and written communication skills;
- Great attendance; and
- Ability to work well with others.

Salary: DOE

Nurse Care Manager - Bellingham – Posting #18-099**Major Duties:**

The NCM works under the supervision of the Program Director and is the primary link between patients diagnosed with opioid use disorder (OUD) and their medication assisted treatment (MAT) waived prescriber. The NCM will coordinate care for the patient to achieve and sustain recovery working with community partners. The NCM will connect patients with waived prescribers who will prescribe one of the FDA approved medications for the treatment of OUD (buprenorphine products, naloxone products).

In fulfilling these duties the incumbent performs the following duties independently:

- Provide assessment and intake of eligible patients, assist with health insurance application and enrollment processes, including Medicaid, for eligible uninsured individuals; ensure proper and complete documentation is collected, forms are signed by and offered to the patient; assess for signs of opioid withdrawal using the Clinical Opioid Withdrawal Scale (COWS); maintain the safety, security, and confidentiality of patients and their families;
- Educate, monitor and assist patients receiving MAT during induction, stabilization and maintenance phases; provide education and support on medications, monitoring pill counts, observed dosing, call-backs and medication refills; work with patients to minimize the diversion of medications for illicit purposes; monitor for any signs of instability and increase contact and/or refer to waived prescriber for further evaluation; work with patient's preferred pharmacy and OBOT team in processing medical orders, prescriptions and refills; evaluate and document medication effectiveness, complications, side effects; and arrange for required lab work according to protocol;
- Coordinate integrated care across OBOT, behavioral health, physical health and recovery support needs; provide coordinated care with respect for patient confidentiality, safety and self-determination;

- Collaborate and communicate patient progress to OBOT team; convene and facilitate OBOT meetings at least twice monthly for care coordination;
- Collaborate with patients to develop an individualized MAT treatment plan, revise when necessary, to address evolving patient need; ensure treatment planning and interventions are patient centered, culturally competent and age appropriate; consider all aspects of the patient, their family's, and their community's psychosocial, economic and cultural needs.
- Collaborate with patient and OBOT team in making referrals to community physicians for assessment and treatment of medical issues; ensure a "warm hand off" when individuals for whom methadone is clinically advised and arrange with the closest and most appropriate provider; collaborate with community partners to increase patient access to other supportive services; assist patient in their selection of approved local treatment providers for counseling and supports;
- Maintain contact with patients and randomly (at least once in the first three months and annually thereafter) ask patients to present their prescription bottle at the OSOT site within 24 hours. Verify unused medication to ensure appropriate remaining amount and provide an urine toxicology screen;
- Ensure Telehealth capacity for waived prescribers is available;
- Collect data and complete all required documentation in an accurate, complete, and timely manner according to agency policy and procedures; seek supervisory assistance if problems with documentation quality or timeliness occur or persist;
- Participate in the implementation of agency tracking systems and chart audit procedures;
- Independently identify program needs and make recommendations to supervisor;
- Actively contribute to program development by participating in agency and community meetings; and
- Other duties as assigned.

Requirements

- Associates degree in nursing ;
- Licensed practical nurse required, or registered nurse (preferred).
- Minimum one year of work experience in a treatment setting;
- Ability to work in fast-paced environment, with excellent oral and written communication skills, critical thinking and problem-solving abilities;
- Sensitive to ethnic, cultural, gender; beliefs, and behaviors, substance use disorders, HIV/AIDS and related medical/social issues;
- Demonstrate understanding of substance use disorders/opioid use disorder and medication assisted treatments;
- Ability to work independently as well as part of a team.
- A strong commitment to the right and ability of each person with a substance use disorder(s) to live, work and have access to helpful, competent and continuous supports and services;
- A strong commitment to working collaboratively, assertively and interdependently with co-workers;
- Skills and competence to establish trusting relationships with persons with substance use disorder(s) and respect for individual rights and personal preferences in treatment;

- Knowledge of pharmacology; clinical treatments of individuals with co-occurring disorders (mental/substance use disorders); crisis intervention; and professional ethics;
- Knowledge of community/health resources;
- Ability to use clear, concise and effective written and oral communication and comply with agency policies when sharing, documenting relevant patient care data.
- Comply with Government Performance Reporting Act (GPRA) data collection requirements. Work with the Project Director and others to meet the goals and requirements of the grant.
- Demonstrated ability to effectively prioritize and organize work to satisfactory completion;
- Ability to drive between work sites throughout the work week;
- Current unencumbered driver license and proof of current car insurance may be required;
- Effective verbal, written and interpersonal skills with ability to interact providers and team members from various settings;
- Ensure own professional development and maintain licensure and/or certification requirements;
- Dependable and reliable attendance.

Major Duties:

This position works under the supervision of the Program Director and is responsible for, prescribing and monitoring of medications and maintaining compliance of the MAT program with all applicable county, state and federal codes. In fulfilling these duties, the incumbent performs the following duties:

- Develop and review of standing orders for appropriate clients;
- Maintain all required charting paperwork requirements as defined by agency contracts or payer requirements;
- Refer clients to other health care services and facilities when appropriate;
- Coordinate with chemical dependency professionals regarding client care;
- Provides consultation as requested by other programs in the agency or by the agency as a whole; and
- Other duties as assigned.

Requirements:

- Possess and maintain a current State medical license (ARNP, MD, or PA);
- Possess a current DEA credential with the ability to prescribe Suboxone;
- Ability to maintain client confidentiality;
- Good verbal and written communication skills;
- Great attendance; and
- Ability to work well with others.

Salary: DOE

Psychiatric Advanced RN Practitioner – MAT Program – Posting #18-077

Major Duties:

This position is responsible for conducting psychiatric assessments; assessing physical health needs; making appropriate referrals to community physicians; and providing management and administration of medication in conjunction with the psychiatrist. In fulfilling these duties, the incumbent performs the following duties:

- Provide service coordination for clients including participation with the individual treatment teams (ITT);
- Participate in and conduct parts of the client-centered comprehensive assessment of psychiatric history (e.g., onset, course and effect of illness, past treatment and responses, and risk behaviors), mental status, and diagnosis; physical health and dental health; use of drugs or alcohol; education and employment; social development and functioning; activities of daily living (e.g., self-care, living situation, nutrition, money management); and family structure and relationships;
- Document client progress in a permanent record of client activity according to established methods and procedures;
- Participate in staff meetings and treatment planning review meetings;
- Take the lead role or participate in providing medication administration and medical services;
- Organize and manage the system of getting medication to clients and integrating medication administration into clients' individual treatment plans;
- Manage pharmaceuticals and medical supplies;
- Coordinate, schedule, and administer medical assessments of client physical health, making appropriate referrals to community physicians for further assessment and treatment, and coordinate psychiatric treatment with medical treatment;
- Provide ongoing assessment of clients' mental illness symptoms and clients' response to treatment. Make appropriate changes in treatment plans to ensure immediate and appropriate interventions are provided in response to changes in mental status or behavior which put clients at risk;

- Provide symptom education to enable clients to identify their mental illness symptoms;
- Provide direct clinical services to clients on an individual, group, or family basis in the office and in community settings to teach behavioral symptom-management techniques to alleviate and manage symptoms not reduced by medication and to promote personal growth and development by assisting clients to adapt to and cope with internal and external stresses;
- Provide individual treatment in the office and in community settings in a stage-based treatment model that is non-confrontational, considers interactions of mental illness and substance abuse, and has client-determined goals;
- In coordination with the other registered nurses on the team, assist and support clients to have and effectively use a personal primary care physician, dentist, and other medical specialists as required;
- Must have a strong commitment to the right and ability of each person with a severe and persistent mental illness to live in normal community residences; work in market jobs; and have access to helpful, adequate, competent, and continuous supports and services. Skills and competence to establish supportive trusting relationships with persons with severe and persistent mental illnesses and respect for client rights and personal preferences in treatment are essential;
- In coordination with Chief Clinical Officer, provide training to Lifeline employees regarding specific subject areas related to expertise;
- Support and implement agency policies and procedures.
- Other duties as assigned.

Requirements:

- Master’s degree in psychiatric mental health nursing;
- Licensed as a Washington State Advanced Registered Nurse Practitioner;
- Carry American Nurses Credentialing Center (ANCC) certification;
- At least one year of work experience in an inpatient or outpatient psychiatric setting is preferred;
- Attend weekly supervision meeting;
- Ability to communicate clearly both verbally and in writing;
- Great attendance;
- Ability to work well with others.
- Ability to accurately complete all tasks as assigned;
- Maintain high level of confidentiality with any and all information acquired;

Mental Health Professional Supervisor – Aberdeen - Posting #18-071

Major Duties:

The MHP Supervisor works under the supervision of the Program Director. This position provides services to agency patients, as well as provides program oversight and clinical supervision for all designated staff in their assigned program. In fulfilling these duties, the incumbent performs the following duties independently:

- Review Washington Administrative Codes (WACs) and Revised Codes (RCWs) and Federal regulations pertaining to mental health and chemical dependency treatment to ensure compliance with these regulations in all therapeutic services;

- Work with the patient in the development of an individual services plan that is strength based and meets their unique needs in compliance with WAC 388-865-0425;
- Provide individual therapy, group therapy and case management services to patients assigned to them in accordance with the individual service plan and evaluation recommendations;
- Work as part of a treatment team;
- Maintain complete and up to date clinical files that document all services and contacts provided consistent with the requirements of WAC 388-865 and 388-877 (if applicable);
- Support and implement agency policies and procedures;
- Participate in staff recruitment, interviewing, work assignments, and performance supervision according to work rules, regulations, and policies and collective bargaining agreements;
- Develop and implement staff training in conjunction with the Program Director.
- Schedule and facilitate supervision sessions;
- Be available on-call to ensure continuity of care for agency patients; and
- Other duties as assigned.

Position Requirements:

- A master's degree or further advanced degree in counseling or one of the social sciences from an accredited college or university required;
- Meet the requirements of a mental health professional as defined in WAC 388-865-0150;
- Have at least 1 year of experience working with adults suffering from co-occurring mental illness and chemical dependence;
- Supervisory experience preferred;
- Familiarity with Washington State regulations related to the provision of mental health services (RCW 71.05) and chemical dependency services (WAC 388-877) required;
- Current unencumbered driver license and proof of current car insurance
- Good verbal and written communication skills;
- Great attendance; and
- Ability to work well with others.

Salary: DOE

Peer Support Specialist – Aberdeen – Posting #18-070

Are you interested in supporting others who are in recovery? Come join Lifeline Connections as a Peer Support Specialist!

Since 1962, Lifeline Connections' mission has been to provide high quality behavioral health treatment. It is only because of our well-trained and dedicated employees that we have been able to continually accomplish our mission.

The Peer Support Specialist position will provide a wide variety of supports, services, and advocacy that contribute to a patient's ability to engage in ongoing treatment and work towards a lower level of care. These activities acknowledge the importance of involving significant others and other natural supports in the person's treatment that could positively impact their sobriety and recovery.

Responsibilities for this position include:

- Provide peer counseling and support, drawing on common experiences as a peer, to validate clients' experiences and to provide guidance and encouragement to clients to take responsibility and actively participate in their own recovery.
- Serve as a mentor to clients to promote hope and empowerment.

- Act as an interpreter to help non-mental health consumer team members better understand and empathize with each client's unique and subjective experience and perceptions.
- Provide expertise and consultation from a mental health consumer perspective to the entire team concerning clients' experiences on symptoms of mental illness, the effects and side-effects of medications, clients' responses to and opinions of treatment, and clients' experiences of recovery.
- Collaborate with the team to promote a team culture in which each client's point of view, experiences, and preferences are recognized, understood, and respected, and in which client self-determination and decision-making in treatment planning are maximized and supported.
- Help clients identify, understand, and combat stigma and discrimination associated with mental illness and develop strategies to reduce self-stigma.
- Help other team members identify and understand culture-wide stigma and discrimination against people with mental illness and develop strategies to eliminate stigma within the team.
- Collaborate with the team to ensure the protection of clients' rights in order to help clients to improve their knowledge of client rights and grievance or complaint procedures.
- Collaborate with the team to help clients learn about pertinent grievance procedures and support clients with filing, mediating, and resolving complaints.
- Increase awareness of and support client participation in consumer self-help programs and consumer advocacy organizations that promote recovery.
- Serve as the liaison between the team and consumer-run programs such as self-help groups and drop-in centers.
- Shared duties in the provision of treatment and substance abuse services.

Position Requirements:

- High school diploma or equivalent required; College degree in a social science preferred;
- Possess certification as a Certified Peer Support Specialist consistent with WAC 388-865-0107, or ability and willingness to obtain certification within 60 days of employment, and disclose self to be a consumer of mental health services;
- Current Washington State Department of Health counselor credentials required;
- Familiarity with Washington State regulations related to the provision of mental health services (RCW 71.05) and chemical dependency services (WAC 388-877);
- Current unencumbered driver license and proof of current car insurance required;
- Good verbal and written communication skills;
- Great attendance; and
- Ability to work well with others.

Training will be provided after hire so please apply with your interest. We look forward to hearing from you!

Chemical Dependency Professional – Mt. Vernon - Posting #18-050

Major Duties:

The Chemical Dependency Professional provides counseling and case management for clients of the agency. The work includes assisting supervisory staff and Program Director in program review, daily management of treatment activities, and training/orientation of junior staff and trainees. The CDP(T) is responsible for the daily treatment activities for clients on their caseload. In providing these services, the incumbent performs the following duties independently:

- Collaborates with the supervisory staff and Program Manager, other senior staff members, and other counselors in building and maintaining an intense treatment environment that motivates clients to focus on problematic behaviors, allow clients to experience the consequences of their actions, and teaches clients more productive coping strategies;
- Assesses the psycho social functioning of assigned clients and develops individualized treatment plans;
- Apprises team members of specific treatment plans and intervention strategies so that therapeutic consistency can be maintained;

- Leads treatment groups according to agency treatment guidelines;
- Develops discharge/aftercare plans and makes appropriate referrals for follow-up care;
- Documents relevant clinical information including treatment plans, treatment reviews, progress notes, and discharge summaries;
- Provides crisis intervention services, information, and referrals to clients and their family;
- Provides motivational counseling to collaterals to encourage participation in family support programs;
- Teaches specialized treatment concepts to client groups according to agency treatment schedule;
- Provides complete and accurate written and oral formats regarding the course of treatment to families, referral sources, and legal representatives;
- Recommends and participates in the development, design and documentation of policies, procedures, and activities for the agency;
- Conducts alcohol/drug assessments pursuant to WAC 388-877, or its successor; and
- Other duties as assigned.

Position Requirements:

- College course work in chemical dependency, human sciences or related field required;
- Must possess a valid Washington State Department of Health CDP credential (CDP preferred, minimum of CDPT required) at time of hire;
- Successful completion of at least one course per quarter/semester toward educational requirements as necessary to obtain an active Washington State Department of Health CDP credential required, if not already obtained;
- Knowledgeable of a wide variety of therapeutic approaches and the ability to set and maintain therapeutic limits. The agency milieu mandates that the incumbent be flexible, versatile and skilled in developing creative behavioral interventions that modify inappropriate behavior;
- Must be capable of functioning autonomously while maintaining continuous communication with other staff members;
- A broad knowledge of the stages of human personality development including cultural, social, and psychological factors affecting individuals and families involved with chemical use;
- Knowledge and practice of crisis intervention theory;
- Knowledge of the various theories, forms, stages, and manifestations of addictive behavior, awareness of common manifestations of resistance to change in the addicted client, awareness of socio-cultural barriers to change, and an in-depth knowledge of alternative coping mechanisms to replace the use of chemicals;
- An understanding of the theory and practice of individual and group treatment of chemical abusing clients to facilitate client self-examination, expression of feelings, insight development, problem solving, and motivation to develop a chemically free lifestyle;
- CPR/First Aid Certification required for inpatient staff members;
- Good verbal and written communication skills;
- Great attendance;
- Ability to work well with others.

Nursing Assistant / Medical Assistant – Posting #19-001

Major Duties: The CNA/MA provides shift coverage, medical management and case management of clients in our residential / sobering units. In providing these services, the incumbent performs the following duties:

- Taking vitals (blood-pressure, pulse, temperature, and respiration) per unit protocol;
- Conducts admissions screening pursuant to Physician's Standing Orders and Sobering Unit Policies and Procedures;
- Obtaining routine lab samples not requiring laboratory personnel.
- Conduct observed medication pass as needed;
- Develops treatment referrals;
- Infection control. Every medical employee is responsible for infection control, but because of the constant contact the MA/CNA has with patients, it is critical for the MA/CNA to know and follow proper protocol in avoiding the spread of germs and spores which transport disease;
- Observation and reporting. Observing the patient and surroundings assists the nurse to assess the progress of the patient as well as any needs the patient might have for medical intervention. The certified nursing assistant will also observe and remove any potential hazards which could cause accidents;
- Intake paperwork;
- Provides discharge planning;
- Monitors client's vitals per Physician's Standing Orders;
- Completes charting requirements per Sobering Unit policy;
- Other duties as assigned.

Requirements and Skills Required by the Position:

- High school diploma or equivalent.
- Current CNA, MA, or HCA credential in the state of Washington required;
- Possess a working understanding of the detoxification process and the signs and symptoms that warrant transfer to a medically supervised detox center, urgent care, or emergency department;
- Current CPR/1st Aid certification required;
- Understand the forms, stages, and manifestations of addictive behavior preferred;
- Have the ability to write detailed progress notes;
- Ability to communicate clearly both verbally and in writing;
- Great attendance;
- Ability to work well with others.

Salary: DOE
