Peer Support Specialist – Sobering Unit – Posting #19-018

Major Duties:

The Peer Support Specialist works under the supervision of the Program Manager. This position provides community based mental health services to agency clients. In fulfilling these duties, the incumbent performs the following duties independently:

- Provide peer counseling and support, drawing on common experiences as a peer, to validate clients' experiences and to provide guidance and encouragement to clients to take responsibility and actively participate in their own recovery.
- Serve as a mentor to clients to promote hope and empowerment.
- Act as an interpreter to help non-mental health consumer team members better understand and empathize with each client's unique and subjective experience and perceptions.
- Provide expertise and consultation from a mental health consumer perspective to the entire team concerning clients' experiences on symptoms of mental illness, the effects and side-effects of medications, clients' responses to and opinions of treatment, and clients' experiences of recovery.
- Collaborate with the team to promote a team culture in which each client's point of view, experiences, and preferences are recognized, understood, and respected, and in which client self-determination and decision-making in treatment planning are maximized and supported.
- Help clients identify, understand, and combat stigma and discrimination associated with mental illness and develop strategies to reduce self-stigma.
- Help other team members identify and understand culture-wide stigma and discrimination against people with mental illness and develop strategies to eliminate stigma within the team.
- Collaborate with the team to ensure the protection of clients' rights in order to help clients to improve their knowledge of client rights and grievance or complaint procedures.
- Collaborate with the team to help clients learn about pertinent grievance procedures and support clients with filing, mediating, and resolving complaints.
- Increase awareness of and support client participation in consumer self-help programs and consumer advocacy organizations that promote recovery.
- Serve as the liaison between the team and consumer-run programs such as self-help groups and drop-in centers.
- Shared duties in the provision of treatment and substance abuse services.

Position Requirements:

- High school diploma or equivalent required; College degree in a social science preferred;
- Possess certification as a Certified Peer Support Specialist consistent with WAC 388-865-0107, or ability and willingness to obtain certification within 60 days of employment, and disclose self to be a consumer of mental health services;
- Current Washington State Department of Health counselor credentials required;
- Familiarity with Washington State regulations related to the provision of mental health services (RCW 71.05) and chemical dependency services (WAC 388-877);
- Current unencumbered driver license and proof of current car insurance required;
- Good verbal and written communication skills;
- Great attendance; and
- Ability to work well with others.

Chemical Dependency Professional (Trainee) – Aberdeen - Posting #18-101**Major Duties:**

The Chemical Dependency Professional Trainee provides counseling and case management for clients of the agency. The work includes assisting supervisory staff and Program Director in program review, daily management of treatment activities, and training/orientation of junior staff and trainees. The CDPT is responsible for the daily treatment activities for clients on their caseload. In providing these services, the incumbent performs the following duties independently:

- Collaborates with the supervisory staff and Program Manager, other senior staff members, and other counselors in building and maintaining an intense treatment environment that motivates clients to focus on problematic behaviors, allow clients to experience the consequences of their actions, and teaches clients more productive coping strategies;
- Assesses the psycho social functioning of assigned clients and develops individualized treatment plans;
- Apprises team members of specific treatment plans and intervention strategies so that therapeutic consistency can be maintained;
- Leads treatment groups according to agency treatment guidelines;
- Develops discharge/aftercare plans and makes appropriate referrals for follow-up care;
- Documents relevant clinical information including treatment plans, treatment reviews, progress notes, and discharge summaries;
- Provides crisis intervention services, information, and referrals to clients and their family;

- Provides motivational counseling to collaterals to encourage participation in family support programs;
- Teaches specialized treatment concepts to client groups according to agency treatment schedule;
- Provides complete and accurate written and oral formats regarding the course of treatment to families, referral sources, and legal representatives;
- Recommends and participates in the development, design and documentation of policies, procedures, and activities for the agency;
- Conducts alcohol/drug assessments pursuant to WAC 246-341, or its successor; and
- Other duties as assigned.

Requirements:

- CDP or CDPT in Washington state required;
- College course work in chemical dependency, human sciences or related field required;
- Successful completion of at least one course per quarter/semester toward educational requirements as necessary to obtain an active Washington State Department of Health CDP credential required;
- Knowledgeable of a wide variety of therapeutic approaches and the ability to set and maintain therapeutic limits. The agency milieu mandates that the incumbent be flexible, versatile and skilled in developing creative behavioral interventions that modify inappropriate behavior;
- Must be capable of functioning autonomously while maintaining continuous communication with other staff members;
- A broad knowledge of the stages of human personality development including cultural, social, and psychological factors affecting individuals and families involved with chemical use;
- Knowledge and practice of crisis intervention theory;
- Knowledge of the various theories, forms, stages, and manifestations of addictive behavior, awareness of common manifestations of resistance to change in the addicted client, awareness of socio-cultural barriers to change, and an in-depth knowledge of alternative coping mechanisms to replace the use of chemicals;
- An understanding of the theory and practice of individual and group treatment of chemical abusing clients to facilitate client self examination, expression of feelings, insight development, problem solving, and motivation to develop a chemically free lifestyle;
- CPR/First Aid Certification required for inpatient staff members;
- Good verbal and written communication skills;
- Great attendance;
- Ability to work well with others.

Psychiatric Advanced RN Practitioner – MAT Program – Posting #18-077

Major Duties:

This position is responsible for conducting psychiatric assessments; assessing physical health needs; making appropriate referrals to community physicians; and providing management and administration of medication in conjunction with the psychiatrist. In fulfilling these duties, the incumbent performs the following duties:

- Provide service coordination for clients including participation with the individual treatment teams (ITT);
- Participate in and conduct parts of the client-centered comprehensive assessment of psychiatric history (e.g., onset, course and effect of illness, past treatment and responses, and risk behaviors), mental status, and diagnosis; physical health and dental health; use of drugs or alcohol; education and employment; social development and functioning; activities of daily

living (e.g., self-care, living situation, nutrition, money management); and family structure and relationships;

- Document client progress in a permanent record of client activity according to established methods and procedures;
- Participate in staff meetings and treatment planning review meetings;
- Take the lead role or participate in providing medication administration and medical services;
- Organize and manage the system of getting medication to clients and integrating medication administration into clients' individual treatment plans;
- Manage pharmaceuticals and medical supplies;
- Coordinate, schedule, and administer medical assessments of client physical health, making appropriate referrals to community physicians for further assessment and treatment, and coordinate psychiatric treatment with medical treatment;
- Provide ongoing assessment of clients' mental illness symptoms and clients' response to treatment. Make appropriate changes in treatment plans to ensure immediate and appropriate interventions are provided in response to changes in mental status or behavior which put clients at risk;
- Provide symptom education to enable clients to identify their mental illness symptoms;
- Provide direct clinical services to clients on an individual, group, or family basis in the office and in community settings to teach behavioral symptom-management techniques to alleviate and manage symptoms not reduced by medication and to promote personal growth and development by assisting clients to adapt to and cope with internal and external stresses;
- Provide individual treatment in the office and in community settings in a stage-based treatment model that is non-confrontational, considers interactions of mental illness and substance abuse, and has client-determined goals;
- In coordination with the other registered nurses on the team, assist and support clients to have and effectively use a personal primary care physician, dentist, and other medical specialists as required;
- Must have a strong commitment to the right and ability of each person with a severe and persistent mental illness to live in normal community residences; work in market jobs; and have access to helpful, adequate, competent, and continuous supports and services. Skills and competence to establish supportive trusting relationships with persons with severe and persistent mental illnesses and respect for client rights and personal preferences in treatment are essential;
- In coordination with Chief Clinical Officer, provide training to Lifeline employees regarding specific subject areas related to expertise;
- Support and implement agency policies and procedures.
- Other duties as assigned.

Requirements:

- Master's degree in psychiatric mental health nursing;
- Licensed as a Washington State Advanced Registered Nurse Practitioner;
- Carry American Nurses Credentialing Center (ANCC) certification;
- At least one year of work experience in an inpatient or outpatient psychiatric setting is preferred;
- Attend weekly supervision meeting;
- Ability to communicate clearly both verbally and in writing;
- Great attendance;
- Ability to work well with others.
- Ability to accurately complete all tasks as assigned;
- Maintain high level of confidentiality with any and all information acquired;

Utilization Management Administrative Assistant – Posting #18-063

Major Duties:

The Admissions Administrative Assistant position works under the supervision of the Admissions Supervisor. This position provides assistance and support to the utilization management process. This includes working with public and private insurance companies to perform ongoing utilization review and authorization for all higher levels of care. In fulfilling these responsibilities, the incumbent performs the following duties independently:

- Collaborates with the supervisory staff and Program Manager, other senior staff members, and other counselors in building and maintaining clinical files sufficient to document and complete authorization;
- Assists clients as needed with necessary documentation needed for treatment;
- Ensures a safe environment that promotes recovery for clients;
- Work as part of the billing unit, functioning as a team to ensure proper services are received by each client;
- Contact insurance companies for explanation of benefits as needed;
- Maintain complete and up to date files that document all services and contacts provided consistent with the requirements of Washington Administrative Code (WAC) and agency policy;
- Complete authorizations for higher level of care admissions as part of a wait list of emergent needs;
- Completes concurrent reviews and coordinates with clinicians on discharge planning and post discharge follow up care;
- Data entry of authorizations, clinical notes, and billing information in clinical files;
- Complete retro-reviews as assigned by management staff;
- Other duties as assigned.

Requirements:

- High School diploma or equivalent required;
- College coursework preferred;
- Experience conducting treatment authorizations with commercial insurance and/or managed care plans, preferred;
- Minimum of one year experience in a clerical capacity;
- Thorough knowledge of agency word processing and data base systems;
- Ability to produce accurate reports, forms, etc.;
- Ability to problem solve;
- Ability to communicate clearly both verbally and in writing;
- Great attendance;
- Ability to work well with others.

Salary: DOE

Chemical Dependency Professional – Mt. Vernon - Posting #18-050

Major Duties:

The Chemical Dependency Professional provides counseling and case management for clients of the agency. The work includes assisting supervisory staff and Program Director in program review, daily management of treatment activities, and training/orientation of junior staff and trainees. The CDP(T) is responsible for the daily treatment activities for clients on their caseload. In providing these services, the incumbent performs the following duties independently:

- Collaborates with the supervisory staff and Program Manager, other senior staff members, and other counselors in building and maintaining an intense treatment environment that motivates clients to focus on problematic behaviors, allow clients to experience the consequences of their actions, and teaches clients more productive coping strategies;
- Assesses the psycho social functioning of assigned clients and develops individualized treatment plans;
- Apprises team members of specific treatment plans and intervention strategies so that therapeutic consistency can be maintained;
- Leads treatment groups according to agency treatment guidelines;
- Develops discharge/aftercare plans and makes appropriate referrals for follow-up care;
- Documents relevant clinical information including treatment plans, treatment reviews, progress notes, and discharge summaries;
- Provides crisis intervention services, information, and referrals to clients and their family;
- Provides motivational counseling to collaterals to encourage participation in family support programs;
- Teaches specialized treatment concepts to client groups according to agency treatment schedule;
- Provides complete and accurate written and oral formats regarding the course of treatment to families, referral sources, and legal representatives;
- Recommends and participates in the development, design and documentation of policies, procedures, and activities for the agency;
- Conducts alcohol/drug assessments pursuant to WAC 388-877, or its successor; and
- Other duties as assigned.

Position Requirements:

- College course work in chemical dependency, human sciences or related field required;
- Must possess a valid Washington State Department of Health CDP credential (CDP preferred, minimum of CDPT required) at time of hire;
- Successful completion of at least one course per quarter/semester toward educational requirements as necessary to obtain an active Washington State Department of Health CDP credential required, if not already obtained;
- Knowledgeable of a wide variety of therapeutic approaches and the ability to set and maintain therapeutic limits. The agency milieu mandates that the incumbent be flexible, versatile and skilled in developing creative behavioral interventions that modify inappropriate behavior;
- Must be capable of functioning autonomously while maintaining continuous communication with other staff members;
- A broad knowledge of the stages of human personality development including cultural, social, and psychological factors affecting individuals and families involved with chemical use;
- Knowledge and practice of crisis intervention theory;
- Knowledge of the various theories, forms, stages, and manifestations of addictive behavior, awareness of common manifestations of resistance to change in the addicted client,

awareness of socio-cultural barriers to change, and an in-depth knowledge of alternative coping mechanisms to replace the use of chemicals;

- An understanding of the theory and practice of individual and group treatment of chemical abusing clients to facilitate client self-examination, expression of feelings, insight development, problem solving, and motivation to develop a chemically free lifestyle;
- CPR/First Aid Certification required for inpatient staff members;
- Good verbal and written communication skills;
- Great attendance;
- Ability to work well with others.

Salary: DOE

Mental Health Professional – Residential – Posting #18-047

Major Duties:

The MHP works under the supervision of the Program Director. This position provides community based co-occurring services to agency clients. In fulfilling these duties, the incumbent performs the following duties independently:

- Review Washington Administrative Codes (WACs) and Revised Codes (RCWs) and Federal regulations pertaining to mental health and chemical dependency treatment to ensure compliance with these regulations in all therapeutic services;
- Work with the client in the development of an individual services plan that is strength based and meets their unique needs in compliance with WAC 388-865-0425;
- Provide individual therapy, group therapy and case management services to clients assigned to them in accordance with the individual service plan and evaluation recommendations;
- Work as part of a treatment team;
- Maintain complete and up to date clinical files that document all services and contacts provided consistent with the requirements of WAC 388-865 and 388-877 (if applicable);
- Support and implement agency policies and procedures;
- Represent the Agency in the community at various meetings and clinical reviews with the approval of the supervisor;
- Be available on-call to ensure continuity of care for agency clients; and
- Other duties as assigned.

Position Requirements:

- A masters degree or further advanced degree in counseling or one of the social sciences from an accredited college or university required;
- Meet the requirements of a mental health professional as defined in WAC 388-865-0150;
- Have at least 1 year of experience working with adults suffering from co-occurring mental illness and chemical dependence;
- Familiarity with Washington State regulations related to the provision of mental health services (RCW 71.05) and chemical dependency services (WAC 388-877) required;
- Current unencumbered driver license and proof of current car insurance
- Good verbal and written communication skills;

Sobering Aide – Posting #19-005

Major Duties:

The Sobering Aide provides shift coverage, medical management and case management of clients in the Sobering Center unit. In providing these services, the incumbent performs the following duties:

- Taking vitals (blood-pressure, pulse, temperature, and respiration) and monitors per unit protocol and Physicians orders;
- Conducts admissions screening pursuant to Physician's Standing Orders and Sobering Unit Policies and Procedures;
- Obtaining routine lab samples not requiring laboratory personnel.
- Conduct observed medication pass as needed;
- Develops treatment referrals;
- Infection control. Every employee is responsible for infection control, but because of the constant contact the Sobering Aide has with patients, it is critical for the Sobering Aide to know and follow proper protocol in avoiding the spread of germs and spores which transport disease;
- Observation and reporting. Observing the patient and surroundings assists the nurse to assess the progress of the patient as well as any needs the patient might have for medical

intervention. The certified nursing assistant will also observe and remove any potential hazards which could cause accidents;

- Intake paperwork;
- Provides discharge planning;
- Completes charting requirements per Sobering Unit policy;
- Other duties as assigned.

Requirements:

- High school diploma or equivalent;
- Current MA, HCA, or CNA credential in the state of Washington preferred;
- Possess a working understanding of the detoxification process and the signs and symptoms that warrant transfer to a medically supervised detox center, urgent care, or emergency department;
- Current CPR/1st Aid certification required;
- Current unencumbered driver license and proof of current car insurance, with the ability to become an approved fleet driver;
- Understand the forms, stages, and manifestations of addictive behavior preferred;
- Willingness to become certified as a Recovery Coach
- Have the ability to write detailed progress notes;
- Ability to communicate clearly both verbally and in writing;
- Great attendance;
- Ability to work well with others.

Salary: DOE

Residential Aide – Women’s Program - Posting #19-004
